Private Forums – Coaching & Training

IMGrind Frequently Asked Questions:

What Makes IMGrind Unique From Other Coaching Forums?

Ryan, myself, the moderators and members of the IMGrind community are here to help 24/7. We're here because we want to be here, not because we need to be. Nowhere online will you find anyone that busts their ass as hard as Ryan and myself. We are here to help YOU succeed! We've also brought in Moderators to the forum that are the best in the business in their respective crafts and skills. We've built our community around the smartest people in Online and Offline marketing and have brought our contacts to the forums. Nowhere can you find the intense level of dedication, motivation and support that IMGrind provides. Nowhere can you find this support, because unlike other forums, we are Entrepreneurs, Advertisers, Affiliates and Lead Brokers. You get the best of everything.

Do We Give Out Working Campaigns?

From A-Z and we even help you build campaigns along the way. We reveal everything from traffic sources to landing pages to the ad creatives. We'll show you what's working, what's working right now and ultimately how to monetize for maximum ROI. We only reveal this type of information to private forum members so join now!

Do I Need Experience?

How about an email address, the ability to type and surf the web efficiently? If you possess that, you just might have a chance. I know, because that's what I started with! Seriously, we can teach you from the ground up, that's what the private forums are all about. Support!

How Much Money Do I Need?

That really depends on you. If you are starting with paid traffic like Google Adwords or Facebook Ads then you will need some budget. However, we teach free ways to make money online as well. To get your own web hosting and website you will need a small budget. You can get both for under \$20 a month starting out. We can give you recommendations if you need it.

Do You Have Reviews And Testimonials?

Profits.IM Review:

Most people in Internet Marketing know Ruck from his founding of the Convert2Media affiliate network and from seeing him at various tradeshows where he's a regular speaker and always available for questions from even the smallest affiliates. He's one of the most trustworthy people in this industry and on a personal note he's helped me make over a million dollars over the last couple of years through his network and with the things I've learned just from picking his brain.

Browie.com Review:

Inside the IMGrind Forum I found nearly 525 threads already created prior to launch. I remember 6 months ago when the launch was "getting close" and they never mentioned a date. Well now we know why. Those two must have been picking every piece of information they could out of their brains to create this content. Plenty of newbie type information along with stuff for the veterans.

Obviously there are the typical topics like PPC and Social and PPV. I think the biggest difference with this community is the mobile and advertiser side of marketing. They have a lot of content on both of these that you don't see everywhere else. Name a traffic type or marketing tactic and it's in there. There isn't much hiding you can see screen captures of some threads on the website before you join.

LukePeerFly.com Review:

The value of the information far exceeds the cost of it. The first day I had a membership to the grind I found a thread that had information on it that I used to make about \$2,000. With one thread on the first day I was a member I learned something that made me enough money of the course over the next month to pay for my membership for 2 years. Now, it wasn't handed me to me and I had to do some work on my end, but if I had never read that thread it is likely that I wouldn't have built the campaign I did. For the next two years I can consider any money I make from information I find on the forum 100% profit.
